RBR wins pivotal contract to assess workers for giant Mozambique LNG project

Agreement is another key step in RBR's strategy to supply assessment, training and labour hire services to the impending Mozambique LNG construction boom

Key Points

- Skills Assessment and training contract awarded to RBR Group via subsidiary Futuro Skills Mozambique (FSM) to assess the skills of those seeking jobs on the upcoming Anadarko-led LNG construction project in Mozambique
- RBR will use its mobile training units in regional centres across Mozambique. The units are equipped to the requirements of the UK's Engineering Construction Industry Training Board (ECITB) to test applicants' skills across the core required disciplines of scaffolding, rigging, pipe-fitting, steel erecting and non-critical welding
- RBR is an accredited ECITB training organisation. All workers on the Anadarko-led project must meet ECITB (or equivalent) standards
- RBR holds a Mozambique labour broking licence, which allows it to supply workers to the LNG construction industry
- RBR has 250,000 Mozambican workers on its database, which is the largest database of its kind in the country
- Under an alliance with Kuiper International, a leading global supplier of skilled expatriate workers, RBR can also provide expatriate labour to the LNG projects

RBR Group (ASX: RBR) is pleased to advise that it has been awarded a pivotal contract to conduct a nationwide skills assessment program (Skills Roadshow) in Mozambique in preparation for construction of the giant Anadarko Petroleum-led LNG project in the country.

The contract has been awarded by the CCS Joint Venture, a consortium of contractors acting on behalf of Anadarko Petroleum. The Skills Roadshow is a joint Mozambique Government and Anadarko initiative.

Under the contract, RBR will play a key role in the Skills Roadshow which will see job applicants assessed in five core technical disciplines: scaffolding, rigging, pipe-fitting, steel erecting and non-critical welding.

RBR will undertake these assessments using its mobile training units, transporting them the length and breadth of the country over several weeks, commencing in the first quarter of 2019.

The Skills Roadshow was officially launched on Wednesday 5 December 2018 by the Mozambique Government and Anadarko Petroleum, at an event held in the capital Maputo.

FUTURO PEOPLE

The contract is a significant step in RBR's strategy to play a key role in supplying assessment, training and labour hire services to the impending LNG construction boom in Mozambique.

As well as assessing workers' skills, RBR's Futuro Skills Mozambique is accredited as a training organisation by the UK's Engineering Construction Industry Training Board (ECITB). All those employed on the Anadarko project must meet ECITB (or equivalent) standards.

Using its Mozambique labour broking licence, RBR can also provide workers to the LNG project both on a one-off basis as well as act as a labour hire company to the project, in which case the worker will remain an employee of RBR while contracted to the client organisation.

RBR has 250,000 Mozambicans on its database, which is the largest database of its kind in the country. RBR will use this database to identify potential candidates for employment on the LNG projects, address any skills gaps via training and assessment, and then match them with employment opportunities. This is crucial because the use of Mozambican labour is a prerequisite for businesses operating in-country, and a key metric in their overall local content obligations.

Below are two photographs taken during the Skills Roadshow launch on 5 December 2018.
